>_ ~/about_me

Fullstack developer with ~7 years building production web apps for startups in Myanmar and the UAE. Specializes in the Laravel / Vue ecosystem and owns projects end to end: database design, API architecture, AWS infrastructure, and deployment. A dependable bridge between messy business requirements and clean, scalable code, with a track record of leading projects and advising early-stage teams.

>_ ~/experience_log

Senior Fullstack Developer

2024 - PRESENT

@ Nokta Software Development - United Arab Emirates

- Led end-to-end development and architecture of a custom CRM + EMR system (Laravel + Vue) that replaced Bitrix and now serves ~60 simultaneous sales, admin, and clinic staff across the UAE and Turkey.
- Eliminated lead duplication, conflicts, and confusion between sales and admin teams through a redesigned lead-flow and ownership model.
- Architected and managed AWS infrastructure (EC2, security, DNS, SSL, backups) for secure, stable, cost-efficient deployments.
- Integrated major third-party services - Twilio WhatsApp and voice, Meta Leads, Snapchat Leads, and landing-page pipelines - to automate lead capture and internal communication.
- Directed execution as project lead and business analyst: gathering requirements, prioritizing features, and shipping continuous updates under rapidly changing needs.
- Mentored a junior developer and an intern, established coding standards, and lifted overall development velocity and code quality.

○ Backend Developer (Freelance) 2024 - 2025

@ iDiamond - United Arab Emirates

- Designed the database schema, API routes, and MVC structure for a custom e-commerce backend, following SOLID principles.
- Built and maintained payment logic for 5 methods – Cash on Delivery, Apple Pay, Samsung Pay, Google Pay, and debit/credit card processing.
- Integrated AWS S3 for secure storage and delivery of product images and 3D model files.
- Worked closely with frontend developers and the team lead to align API design with UI/UX and evolving business needs.
- Delivered a production-ready v1 under shifting requirements, keeping the codebase stable, scalable, and clean.

○ Fullstack Developer 2023 - 2024

@ Power Global Co., Ltd - Myanmar

- Designed and built Myanmar's first Event Management System, deployed at major expos including Build 8 x Agri Expo 2024 and Myanmar Textile Expo 2024 – handling 10,000+ attendees/day across 3-day events.
- Built online and onsite registration workflows with instant visitor/VIP card printing and QR-coded entry passes.
- Implemented QR verification supporting handheld scanners and mobile devices for fast, secure check-ins.
- Developed a live lottery system for on-stage visitor engagement, wired to real-time event data.
- Engineered visitor classification and data management (interests, industry, demographics) with full import/export migration tools.

○ Fullstack Developer 2021 - 2023

@ KBTC Group of Companies - Myanmar

- Built a complete School Management System from scratch, onboarding 1,000+ new students per term across the group's schools and universities, with bulk XLSX/CSV import/export.
- Developed automated student ID card generation with QR codes for emergency details and verification.
- Created a full Incident Management System for IT/Admin – ticket creation, assignment, escalation, resolution tracking, and reporting.
- Integrated Microsoft Azure AD SSO and Teams notifications (via Power Automate) for real-time ticket updates and streamlined operations.
